

Williams & Partner LEADERSHIP SERIES

INVISIBLE PRINCIPLES

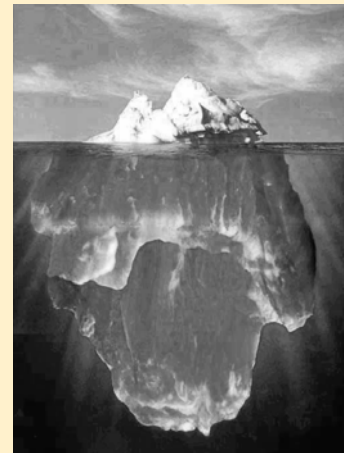

How to unleash ultimate cooperation and motivation within your organization.

WHY?

Every organization where people are involved works by certain informal rules. If these principles are ignored problems often arise below the surface of the formal aspect. This is often described as organizational iceberg below the water line. If effect gets "chronic" then the result is dropping productivity, decreasing motivation or refusal in cooperation.

In day to day business these problems appear as individual failures or are seen as "abnormal" behaviour. It often shows that these patterns cannot be managed with the usual leadership skills.

In this workshop we will learn to recognize the functionality of the core principles of an organization. This understanding enables you to consciously influence processes and therefore the development of your company.
